SKF Bushings

SKF bushing range nomenclature has a defined prefix of PHF. The bushing range is covered by limited standards, but main SKF range is interchangeable with other brands.

Bushings

The bushing range designation from SKF has the following is an example to indicate set up.

SKF Designation prefix

PHF TB2517 X55MM

Bushing size and type

Example:

TB2517 – taper bushing size 2517

M – QD series M

FX10 – FX friction bush series 10

Supplementary

Bore sizes and dimensions

QD & taper bushing

X55MM – 55mm bore diameter standard keyway

-2⁻³/₄ – inch shaft 2⁻³/₄ with standard keyway

50X80 – FX bushing bore and OD dimensions

Note

See SKF product training for full supplementary notations

Bushings and Hubs (PHF Product Group)

SKF Taper bushings, QD bushings, Weld-on and Bolt-on hubs are manufactured according to established market standards and are fully interchangeable with other brands.

Metric bore keyway machined according to BS 4235: Part 1 and DIN 6885.

Imperial bore keyway machined according to BS 46: Part 1.

Phosphate coating and blackening are used to improved corrosion resistance, excluding FX bushings.

Main materials used in bushings and hubs

Taper bushing	Grey cast iron HT250
QD bushing	Grey cast iron HT250
Weld on and Bolt on hubs	Grey cast iron HT250
FX Bushings	C45 Steel

Note: Bushings cannot be bored out larger than listed.

Bushings are supplied with screws: 1008 – 3030 (2 screws); 3525 – 6050 (3 screws); 7060 – 10085 (4 screws); and 120100 (6 screws).

¹⁾ Bushings are also available with coarse thread (UNC) according to ASME/ANSI standard. To complete designation, add U before bushing number and bore size at the end of designation, e.g. PHF TBU3525X70MM.

²⁾ Screw size x length.

A is the diameter at the face of the bush and D is the bolt pitch diameter.

To complete designation, add bore size. For example: PHF TB1215X16MM designates a 1215 taper bushing with a 16 mm bore.

³⁾ Indicates shallow key required (e.g. DIN 6885/3).

Sizes 1008 – 3030 may be supplied in either 3 hole or 4 hole. There is no difference in their respective performance characteristics.

The metric system does not refer to keyseat or keyway dimensions as the inch system. Instead, dimensions are given for the key itself which is rectangular in shape, not square as in the inch system.
